The skills you gain in learning to draw can easily translate into painting or any other art form you care to enjoy. This 10-week course will cover drawing fundamentals, including measuring to get a drawing off to a good start, along with the basics of composition, value and gradients, edges, and one- and two-point perspective. Students will be introduced to a variety of strategies to improve drawing skills and boost self-confidence including one class with a live model. Classes will begin with a demonstration, after which students will work individually from provided reference photos. Students are also welcome to bring their own reference photos. This class is suitable for absolute beginners to more advanced students who are looking to brush up on their drawing skills. The class will introduce students to both graphite and charcoal and the many beautiful effects that can be achieved with these versatile media.

Repeat students may begin Bague drawing or work on more advanced studies.
